Nagar Yuwak Shikshan Sanstha's
Yeshwantrao Chavan College of Engineering
(An Autonomous Institution affiliated to Rashtrasant Tukadoji Maharaj Nagpur University)
Hingna Road, Wanadongri, Nagpur - 441 110
NAAC A++
Ph.: 07104-237919, 234623, 329249, 329250 Fax: 07104-232376, Website: www.ycce.edu

Department of Computer Technology

Vision Statement of the Department.

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission Statement of the Department.

To nurture computer engineering professionals by offering Dynamic learning environment that encourages problem-solving using emerging technology, National Education Policy aligned evidence-based technical education, fostering ,innovation, research, and industry–institute collaboration & Holistic, ethical and sustainable development for lifelong success.

Session 2026-2027

Vision: Dream of where you want.	**Mission:** Means to achieve Vision

Program Educational Objectives of the program (PEO): (broad statements that describe the professional and career accomplishments)

PEO1	**Preparation**	**P: Preparation**	**Pep-CL abbreviation pronounce as Pep-si-IL easy to recall**
PEO2	**Core Competence**	**E: Environment (Learning Environment)**	
PEO3	**Breadth**	**P: Professionalism**	
PEO4	**Professionalism**	**C: Core Competence**	
PEO5	**Learning Environment**	**L: Breadth (Learning in diverse areas)**	

Program Outcomes (PO): (statements that describe what a student should be able to do and know by the end of a program)

Keywords of POs:
Engineering knowledge,Problem analysis, Design/development of solutions,Conduct Investigations of Complex Problems, Engineering Tool Usage, The Engineer and The World,Ethics, Individual and Collaborative Team work,Communication, Project Management and Finance, Life-Long Learning

PSO Keywords: Cutting edge technologies, Research

"I am an engineer, and I know how to apply engineering knowledge to investigate, analyse and design solutions to complex problems using tools for entire world following all ethics in a collaborative way with proper management skills throughout my life." *to contribute to the development of cutting-edge technologies and Research*.

Integrity: I will adhere to the Laboratory Code of Conduct and ethics in its entirety.

Name and Signature of Student and Date
(Signature and Date in Handwritten)

Department of Computer Technology

Vision Statement of the Department.

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission Statement of the Department.

To nurture computer engineering professionals by offering Dynamic learning environment that encourages problem-solving using emerging technology, National Education Policy aligned evidence-based technical education, fostering ,innovation, research, and industry–institute collaboration & Holistic, ethical and sustainable development for lifelong success.

Session	2024-25 (ODD)	Course Name	Web Technology Lab
Semester	3	Course Code	23CT1301
Roll No	14	Name of Student	MANJIRI BHAISE

Practical Number	**4-B**
Course Outcome	**Course Outcome** **Students will be able to understand and apply JavaScript DOM manipulation techniques to create interactive and dynamic web applications such as a To-Do List.**
Aim	**To create a simple To-Do List web app using JavaScript DOM manipulation to add, delete, and complete tasks.**
Problem Definition	**B. JavaScript — DOM Manipulation** **Sample Problem Statement:: Build a To-Do List web app where users can add,** **delete, and mark tasks as complete, using vanilla JavaScript DOM methods only.**
Theory (100 words)	**Theory** **The Document Object Model (DOM) is a programming interface that represents an HTML document as a tree of elements. JavaScript can use DOM methods to access, create, modify, and remove HTML elements dynamically. In a To-Do List application, DOM manipulation is used to add new tasks to the list, mark tasks as completed, and delete unwanted tasks. Methods such as getElementById(), createElement(), appendChild(), and remove() help manage webpage elements. Event listeners are used to respond to user actions such as button clicks. Thus, JavaScript DOM manipulation makes web pages interactive and dynamic.**

Vision Statement of the Department.

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission Statement of the Department.

To nurture computer engineering professionals by offering Dynamic learning environment that encourages problem-solving using emerging technology, National Education Policy aligned evidence-based technical education, fostering ,innovation, research, and industry–institute collaboration & Holistic, ethical and sustainable development for lifelong success.

Procedure and Execution (100 Words)	**Procedure** **1. Create the HTML structure for the To-Do List.** **2. Add an input field and button to enter tasks.** **3. Use JavaScript DOM methods to access the required elements.** **4. Create a new list item when the user adds a task.** **5. Add options to mark tasks as completed or delete them.** **6. Apply event listeners to handle user actions.** **7. Test the application by adding, completing, and deleting tasks.** **Execution** **The web page was opened in a browser and the To-Do List was tested. New tasks were entered using the input field and added to the list. Tasks were marked as completed by clicking the appropriate option and unwanted tasks were deleted successfully. Thus, the application performed all required operations using vanilla JavaScript DOM manipulation.**

Vision Statement of the Department.

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission Statement of the Department.

To nurture computer engineering professionals by offering Dynamic learning environment that encourages problem-solving using emerging technology, National Education Policy aligned evidence-based technical education, fostering ,innovation, research, and industry–institute collaboration & Holistic, ethical and sustainable development for lifelong success.

Code :

```
<!DOCTYPE html>

Mission Statement of the Department.

To nurture computer engineering professionals by offering Dynamic learning environment that encourages problem-solving using emerging technology, National Education Policy aligned evidence-based technical education, fostering ,innovation, research, and industry–institute collaboration & Holistic, ethical and sustainable development for lifelong success.

```
<div class="box">

   <h2>📝 To-Do List</h2>

   <input id="task" placeholder="Enter task">
   <button onclick="addTask()">Add</button>

   <ul id="list"></ul>

</div>

<script>

function addTask() {

   let task = document.getElementById("task").value;

   if (task == "") {
      alert("Enter a task");
      return;
   }

   let li = document.createElement("li");

   li.innerHTML = task + " ";

   li.onclick = function() {
      li.style.textDecoration = "line-through";
   };

   let del = document.createElement("button");

   del.innerHTML = "Delete";

   del.onclick = function() {
      li.remove();
   };

   li.appendChild(del);

   document.getElementById("list").appendChild(li);

   document.getElementById("task").value = "";
}
```

Vision Statement of the Department.

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

	Output: 
Link of student Github profile where lab assignment has been uploaded	https://github.com/manjiribhaise.com
Conclusion	**Thus, the To-Do List web application was successfully created using vanilla JavaScript and DOM manipulation. Users can add new tasks, delete tasks, and mark tasks as completed. This demonstrates how JavaScript can be used to dynamically create, modify, and remove HTML elements through DOM methods.**
